PROFILE

BCA student and aspiring Frontend Developer skilled in HTML, CSS, JavaScript, React, and Python. Passionate about building responsive and modern web applications with interactive user experiences. Currently developing a real-world web platform named 'Learn_2_Ride' focused on connecting learners and trainers.

TECHNICAL EXPERIENCE

Learn_2_Ride – Driving Learning Platform

Tech Stack: NextJs, TailwindCSS, Shadcn/UI, NodeJs, ExpressJs, MongoDB

- Developed a web-based platform connecting learners and trainers.
- Designed role-based login system for learner, trainer, and admin.
- Implemented enquiry system and trainer verification workflow.
- Focused on responsive UI and user-friendly experience.

Personal Portfolio Website

Tech Stack: HTML, CSS, JavaScript

- Designed and developed a modern responsive portfolio website.
- Added animated UI sections and interactive design elements.
- Deployed globally using GitHub Pages.

AuraCalc :- A modern Calculator

Tech Stack: HTML, CSS, JavaScript

- Developed an advanced calculator with scientific operations, custom expression parsing, and AST-based evaluation.
- Implemented real-time function graphing with interactive zoom and pan capabilities.
- Designed a responsive UI with theme customization, keyboard support, and calculation history tracking.

Amazon UI Clone

Tech Stack: HTML, CSS

- Developed a responsive Amazon-inspired landing page.
- Improved frontend design and layout structuring skills.
